Design EHS Compliance Program and Management Systems Implementation Support

Our Environmental, Health and Safety Management Services program is designed to assist organizations in developing and maintaining a high level of safety and environmental awareness among management and employees.

One of our Safety Professionals will conduct a preliminary site visit, *dzb* and then work with you to develop a detailed plan of action. The plan may require the services of an safety professional a few hours a month or several days a week depending on the amount of work needed to attain compliance, fill the gaps or to boost your company's safety program to the next level.

We work in close co-operation with the site-team especially to develop SOP (Standard Operating Procedure) along with the complete EHS Management System. Additionally we assist you with:

- Setting up your EHS policy & Safety operating procedures
 - Determining site's specific Environmental, Health and Safety risks
 - Risk ranking and assessment of impact to Occupational Health & Safety
 - Pro-active and preventive preparation of Safety plans as well as safety procedures
 - Post-occurrence arrangements: Design emergency procedure
 - Emergency preparedness: Design emergency plans
-

On-Site Expert EHS Professionals Staff

Today's industrial companies demand cost-effective and reliable solutions to address the economic challenges that are affecting profits. Nothing assures customer satisfaction like experienced people performing quality work. Our skilled individuals and specialty teams are available.

Special equipment's

Confined space entry rescue equipment

Fall protection equipment

air monitoring equipment

Ventilation

Side entry system

Fire protection stations

Emergency shower & eye wash stations

Portable Ventilations Fan

Perimeter gas detection

Personal monitors

Breathing air protection

Contractor Pre-Qualification Services Assistance

Company and each working location will most likely have different corporate and legislative requirements. Our system is designed to suit each client's specific compliance and industry legislative pre-qualification requirements.

Artech will work to your specific "rules" to determine how a contractor is pre-qualified. In this way, you can know a contractor's capabilities and, in turn, identify the potential for any risks, safety breaches and possible effects on project delivery time.

We are specialized and expert of all client's CMS Work Process and selection criteria Artech provide third party pre-qualification services to ensure contractors are compliant with the standards and make contractor selection quicker and easier. Our efficient processes allow for fast pre-qualification, with less strain on your business, and your time line.

Development of custom-made animated training movies

We offer a complete end-to-end animated safety video production service.

Using visual medium for education provokes better learning, as it evokes two most important organs of human anatomy simultaneously, i.e. eyes and ears. Hence, information is retained easily and for a longer duration.

Benefits of animated videos in EHS

- Presents true-to-life situations that learners face every day.
- Imparts consistent information in every session.
- Can hold the audience attention by portraying emotional touches to generate emotional response.
- Addresses multi-lingual needs to cover audiences of various regions & nationalities.
- Easy to grasp and register even for non-literate/local work-force because of AUDIO-VISUAL presentation.
- Ideal for demonstrating processes which are impossible to observe in reality.
